

Your innovative partner

Your brewing side streams in good hands - for innovative products and reliable sustainability stories.

Leiber
Excellence in Yeast

Leiber refines brewers' yeast into innovative products for humans and animals.

For our customers we conduct research in our own laboratories and develop tailor-made solutions for healthy nutrition, biotechnology and agricultural applications. We reliably supply excellent products – and have been upcycling at world-market level since 1954.

Due to the fact that Leiber uses brewers' yeast completely in terms of sustainability, every brewery has a big added values by working with us as brewers' yeast collection partner.

A partnership with Leiber enables breweries to use our exciting, modern and differentiating upcycling-stories for the extension of their own sustainability communication.

Every sustainability strategy can be enriched with concrete examples to show, which additional contribution has been made towards the own taken measures.

Benefit from us for your innovation and sustainability communication and make it more concrete, differentiating and emotional – with Leiber as your sustainability-story partner.

The Leiber principle

Logistics
